

CONCRETE AGITATOR SKID

5 M³ AGITATOR

USED FOR THE TRANSPORTATION OF CONCRETE.

Used for the transportation of concrete. The concrete agitator is placed on top of a 23t rail trailer to transform the rail trailer into a rail mounted concrete agitator. A 5 cubic meter barrel and its low build height allowing for easy pour via two hatches on top and dispatch out via a hydraulic door and chute.

KEY FEATURES

- 200L water tank and pump on board
- Safe access walk way along mixer
- 4m reach ability from rail track centre
- Agitator height options from rail include 685mm and 1435mm although custom options available on request
- Drop pipe available to assist with pour
- Variable discharge speeds for controlled concrete pouring
